The graph shows the percentage of natives and immigrants in two categories: quality-unadjusted and quality-adjusted.

- In the quality-unadjusted category, the percentage for natives is 43.85% and for immigrants is 58.5%.
- In the quality-adjusted category, the percentage for natives remains at 43.85% while for immigrants it is 44.4%.

The graph indicates that immigrants have a higher percentage in both categories compared to natives.
