The line chart illustrates the Quality of Service (QoS) value over time, with two distinct lines representing Static and Dynamic QoS scenarios.

- **Static (Avg 0.855)**: The dashed line indicates a relatively stable QoS value around 0.855, showing minor fluctuations over time.
- **Dynamic (Avg 1.079)**: The solid line depicts a more volatile QoS value, with peaks and troughs, averaging around 1.079.

The x-axis represents the time in days, ranging from 0 to 30, while the y-axis shows the QoS value, ranging from 0 to 1.6.
