Figure 1.

(a) Flow cytometry plots showing the distribution of CD3+ and CD4+ cells in different patient groups.

(b) Scatter plots illustrating the percentage of CD3+CD4+IL17+ cells in various patient groups, with statistical significance indicated by p-values.

(c) Similar scatter plots for CD3+CD45RO+IL17+ cells, highlighting significant differences.

(d) Additional scatter plots comparing HC PBMC, RA PBMC, RA SFMC, HC PBMC, RA PBMC, RA SFMC, RA paired samples, with significant p-values noted.

Statistical significance is noted as follows:

- p = 0.04
- p = 0.008
- p = 0.009
