(a) Histogram showing histology scores for various treatment groups including arthritic EC0746, EC0746 + competitor, MTX, and Etanercept. The bars indicate the mean scores with error bars showing the standard deviation.

(b) Images showing histology sections for arthritic and competitor alone, EC0746, and EC0746 + competitor. The images highlight different structural changes such as inflammation, pannus, cartilage damage, and bone resorption.

(c) Bar graph showing mean histology scores with percentages indicating the reduction in damage compared to control and arthritic groups. The treatments show varying degrees of effectiveness.

(d) Graph showing mean paw thickness for different treatment groups. The graphs indicate the reduction in paw swelling with treatments EC0746, EC0746 + competitor, MTX, and Etanercept.
