**Figure S1.0**

The figure illustrates the change in total body mass over time post-CAIA induction for different treatment groups:

- **Vehicle**
- **CEP-33779 10mg/kg**
- **CEP-33779 30mg/kg**
- **CEP-33779 55mg/kg**
- **Dex 1.5mg/kg**

The graph shows the body mass in grams (y-axis) against the number of days post-CAIA induction (x-axis). The data points are indicated with error bars, suggesting variability within the groups.
