Z score

B

-log10(adj. p)

- endocytosis
- cell projection
- enzyme-linked receptor protein signaling
- BMP signaling
- TGFβ signaling
- SMAD binding
- inflammatory response
- regulation of cytokine production
- positive regulation of IL-1β secretion
- mononuclear cell proliferation
- Fcγ Receptor-mediated phagocytosis
- NOD-like receptor signaling
- Toll-like receptor signaling
- response to wounding
- positive regulation of TNF
- defense response
- chemotaxis
- Jak–STAT signaling
- IL-17 signaling
- T Helper cell surface molecules
- T cell receptor signaling
- B cell
- antigen processing and presentation
- cellular defense response
- regulation of T cell activation
- Natural killer cell mediated cytotoxicity
- cytokine–cytokine receptor interaction
- lymphocyte activation
- Immunoglobulin V-set domain
- Immunoglobulin subtype
