A

B

Confirmed ≥33% in Months 0-3; N = 17 (1.4%)

Study drug discontinued on Day 71 due to increased creatinine

Study drug discontinued due to sepsis

ULN 50-year-old Male

ULN 50-year-old Female

C

Confirmed ≥33% in Months 0-3; N = 23 (1.9%)

Patient had an SAE of myocardial infarction

Study drug discontinued due to dermatitis

ULN 50-year-old Male

ULN 50-year-old Female

Patients completed study

**Note:** BID = twice daily; N = number; SAE = serious adverse event; SCr = serum creatinine; SE = standard error; ULN = upper limit of normal. ULN 50-year-old Male is 1.3 mg/dl, ULN 50-year-old female is 1.1 mg/dl.
