**A.** CD31 (blue) and SMA (red) staining in the mesentery of a wild-type donor. **B.** CD31 staining in the mesentery of a NG2 KO donor. **C.** Wild-type (WT) and NG2 KO (KO) tumors stained with CD31. **D.** Graph showing vessel diameter in WT and KO tumors. 

**E.** Spontaneous tumors stained with NG2 and CD31. **F.** Py 8119 tumors stained with NG2 and CD31. 

**K.** TAM Abundance (% EGFP) for WT and KO BM recipients. 

**L.** Flow cytometry of wild-type donor cells stained for TIE2 and F4/80. **M.** Flow cytometry of NG2 KO donor cells stained for TIE2 and F4/80. 

**N.** TEM Abundance (% EGFP) for WT and KO BM recipients.
