Figure 4

A. Heart Rate [bpm] over days post burn, showing different trajectories for different age groups.

B. CI [L/min/m²] over days post burn, with similar trends as in A.

C. SVRI [dyn*s*cm⁻⁵*m²] over days post burn, with distinct patterns for different age groups.

D. CVP [mm Hg] over days post burn, depicting stable levels throughout.

* denotes statistical significance for comparison between groups.
