157 ventilated patients after a resuscitated cardiac arrest due to shock-sensitive rhythm

46 excluded patients (time to ROSC not available)

111 studied patients

50 patients with ST elevation
- 47 coronary angiography
- 37 PCI
- 35 MTH at 32-34°C
- 15 external cooling (< 36°C)
- 27 survivors

61 patients without ST elevation
- 44 coronary angiography
- 9 PCI
- 43 MTH at 32-34°C
- 18 external cooling (< 36°C)
- 34 survivors
