Figure 3

![Diagram showing changes in sRAGE, IL-6, Thrombomodulin, HMGB-1, and Creatinine Clearance over time for IIT-Diabetic and CIT-Diabetic groups.](image)

- **sRAGE (pg/ml)**: The graphs show a downward trend over time, with a statistically significant difference ($P = 0.03$).
- **IL-6 (pg/ml)**: A similar trend is observed, with a noticeable decrease over time.
- **Thrombomodulin (ng/ml)**: The levels decrease over time, with a significant difference ($P = 0.03$).
- **HMGB-1 (ng/ml)**: Noticeable changes over time, but no significant difference indicated.
- **Creatinine Clearance (ml/min)**: Minimal changes observed over time.

The graphs indicate a decrease in sRAGE, IL-6, and Thrombomodulin levels, with significant differences between the IIT-Diabetic and CIT-Diabetic groups. HMGB-1 and Creatinine Clearance show minor changes.
