Figure A: Scatter plot showing the correlation between TATc (ng/mL) and Pulmonary suPAR (ng/mL). The correlation coefficient is $r = 0.42$ and the p-value is $P = 0.001$.

Figure B: Scatter plot showing the correlation between PAA (%) and Pulmonary suPAR (ng/mL). The p-value is $P = 0.14$. 

Correlation between TATc and Pulmonary suPAR was $r = 0.42$, with a p-value of $P = 0.001$.
