TNFα reduction with single AZD9773 dosing

- Cohort 1: No discernible effect on circulating TNFα concentrations (50 units/kg anti-TNFα)
- Cohort 2: A single dose of 250 units/kg reduced TNFα concentrations close to LOQ within 2 hours.

Median baseline TNFα concentration: Placebo: 5.0 pg/mL; Cohort 2: 9.8 pg/mL; LOQ, limit of quantification (1.3 pg/mL)
