Continue fluid resuscitation, when:

1. **MAP < 60 mmHg**

   or

2. **ScvO2 < 65%**

   or

3. **UO < 0.5ml/kg**

   or

4. **Hct > 55%**

- If the points 2 to 4 are fulfilled, but not point 1, start vasopressor therapy.
- If the points 1 to 4 are fulfilled, reduce fluid resuscitation.
