**Rectal Temperature**

![Bar graph showing rectal temperature (°C) for Control, IgG, and anti-CXCL10 groups.]

**Plasma IL-6**

![Bar graph showing plasma IL-6 (pg/ml) for IgG and anti-CXCL10 groups.]

**Plasma MIP-2**

![Bar graph showing plasma MIP-2 (pg/ml) for IgG and anti-CXCL10 groups.]

### Key Points
- **Rectal Temperature**
  - Control group shows the highest rectal temperature with IgG and anti-CXCL10 groups being significantly lower.

- **Plasma IL-6**
  - IgG group has significantly higher plasma IL-6 levels compared to anti-CXCL10 group.

- **Plasma MIP-2**
  - Similar trend observed with IgG group having higher levels compared to anti-CXCL10 group.
