Patients with ICU stay > 24 hours, Age 18-75
N = 810

ICU Mortality
N = 114 (14.1%)

Patients excluded:
Language (57)
Psychiatry / abuse (22)
Severe head injury/disease (70)
Unable/cognitive failure (48)
Without permanent address (17)
N = 214

Died < 6 weeks post ICU discharge
N = 69 (14.3 %)

Discharged patients
N = 482

Eligible patients invited to the study
N = 413

At 4-6 weeks:
Refused to participate
N = 56

At 4-6 weeks:
Did not respond
N = 102

Participating patients
4-6 weeks post ICU discharge (baseline)
N = 255 (61.7%)

At 12 months:
Died (3)
Refused to participate (6)
Did not respond (50)
N = 59

Patients that responded only at 12 months
N = 43 (10.4 %)
(Not included in the analyses)

Participating patients
3 months follow-up
N = 192

At 12 months:
Lost to follow up
N = 25

Participating patients
12 months follow-up
N = 194 (47.0%)
