A. Serum RBP4 (mg/L) in no diabetes and diabetes.

B. Serum RBP4 (mg/L) in BMI ≤ 30 and BMI > 30.

C. Scatter plot showing the relationship between serum RBP4 (mg/L) and C-Peptide (nmol/L) with a correlation coefficient of $r = 0.305$, $p = 0.001$.

D. Scatter plot showing the relationship between serum RBP4 (mg/L) and HOMA-insulin sensitivity with a correlation coefficient of $r = -0.248$, $p = 0.009$. 

Note: n.s. indicates not significant.
