(a) Fold-changes of HNF1α (differentiated / proliferative) for Total RNA and Polysome-bound RNA. The bars represent Microarray and Real-time PCR data.

(b) Western blot analysis showing % p-HNF1α with bands labeled P (55) and D (38).

(c) Fold-changes of HNF4α (differentiated / proliferative) for Total RNA and Polysome-bound RNA. The bars represent Microarray and Real-time PCR data.

(d) Western blot analysis showing % p-HNF4α with bands labeled P (0) and D (82).
