(a) Bar chart showing the number of effectors for different species: Ph. ultimum and Ph. ramorum. The graph includes an estimate and a false positive.

(b) Bar chart comparing the number of effectors for RXLR, RXLX, and RXLMFY[HKR] motifs between Ph. ultimum and Ph. ramorum.

(c) Diagram with three segments labeled 'SigP Conserved Motifs Region', 'Variable Region', and 'Not Secreted'.

(d) Frequency of YxSL[KR] motif position in secreted and non-secreted categories for Ph. ultimum, Ph. sojae, Ph. ramorum, and Ph. infestans.

(e) Phylogenetic tree illustrating the relationship between different species with YxSL[KR] motif positions.
