Meister, Schott et al., Additional file 11

A bar chart showing the percent of surviving worms after different hours of paraquat treatment. The chart compares treatments labeled as hpl-2, WT, and daf-2. The p-values for each time point are indicated:
- 12 hours: P=0.07, P=0.01
- 24 hours: P=0.13
- 36 hours: P=0.02, P<0.01, P=0.11
