SOLiD sequencing (tmm) (canonical sequences only)

(a) Agilent miRNA microarray (mean signal intensity) vs. SOLiD sequencing (tmm) (recursive matching) with a correlation coefficient of $r = 0.80$

(b) Applied Biosystems TaqMan LDA (mean transformed signal) vs. SOLiD sequencing (tmm) (recursive matching) with a correlation coefficient of $r = 0.69$

SOLiD sequencing (tmm) (canonical sequences only) with a correlation coefficient of $r = 0.76$
