• Counteracting host adaptive immune response
• Counteracting host antiviral response
• Decreasing endothelial barrier function
• Induction of proinflammatory cytokines

Antagonizing host innate immune response: preventing IFN-α/β-induced gene expression

VP24
Antagonizing host innate immune response: preventing IFN-α/β-induced gene expression

VP30

GP
- Counteracting host adaptive immune response
- Counteracting host antiviral response
- Decreasing endothelial barrier function
- Induction of proinflammatory cytokines

VP35
Antagonizing host innate immune response

VP40

NP
Antagonizing host innate immune response
