Additional file 7: Pairwise microsatellite $F_{ST}$ values between all sampling sites. Sampling sites are indicated by the site abbreviations, and letters from A–G indicate GENELAND groups. Colors indicate within-group $F_{ST}$ values. Red and bold $F_{ST}$ values indicate significant values (all). Significance levels were adjusted according to the FDR. Below the diagonal, uncorrected $F_{ST}$ values are shown; above the diagonal, ENA-corrected $F_{ST}$ values are shown.
