1. Arachidonic acid metabolism
2. Biosynthesis of unsaturated fatty acids
3. Cutin, suberine and wax biosynthesis
4. Ether lipid metabolism
5. Fatty acid biosynthesis
6. Fatty acid metabolism
7. Fatty acid elongation
8. Glycerolipid metabolism
9. Glycerophospholipid metabolism
10. Linoleic acid metabolism
11. Primary bile acid biosynthesis
12. Sphingolipid metabolism
13. Steroid biosynthesis
14. Steroid hormone biosynthesis
15. Synthesis and degradation of ketone bodies
16. Alpha-Linolenic acid metabolism
