Fig. S1 Cre recombination in liver cells expressing Gfi1.
(a) Cryosection of liver from a cross between a Gfi1-Cre mouse and a TdTomato reporter mouse (Ai14) stained with DAPI and phalloidin. TdTomato is found in a subset of cells in the liver that is likely consistent with Kupffer or endothelial cells. (b) Enrichment of Gfi1 transcripts in the IP samples as compared to the input samples was assessed by reverse-transcription followed by real time PCR.
