Colon
CD8
CD4
CD14
Brain
M. fascicularis

Cortex high expressed genes

protein localization to endoplasmic reticulum
cotranslational protein targeting to membrane
SRP−dependent cotranslational protein targeting to membrane
protein targeting to ER
regulation of programmed cell death
regulation of cell death
regulation of apoptotic process
programmed cell death
establishment of protein localization to endoplasmic reticulum

Stomach and Pituitary high expressed genes

structural constituent of ribosome
cell adhesion molecule binding
insulin−like growth factor binding
growth factor binding
fibronectin binding
intramolecular oxidoreductase activity
integrin binding
cytokine binding
signaling receptor binding
cysteine−type endopeptidase activity

GO: Biological Process
