Figure S1. Many enhancers respond to *M. tb* infection with increased eRNA expression. a Expression of all 8,667 macrophage enhancer eRNA in non-infected and infected macrophages; each bin includes the left edge. b Expression of 2,999 enhancer eRNA associated with up-regulated DEGs; expression in TPM was averaged across replicates. (*) indicate paired two-sided Wilcoxon signed-rank test p-value < 2.2*10^-16.
