$Z_{HD} = 3.02$
Fig. S7. Long-range differences of allele frequencies and heterozygosity between an elite group (Group IIIb) and the other groups in the selection signature analysis. Left column: the 40 years of selection between Groups IIIb and I. Middle column: the second 20 years of selection between Groups IIIb and II. Right column: the difference between the elite group and their contemporaries (Groups IIIb and IIIa).
