Figure A: Images showing the YFP-UgtP expression in WT and OLI- strains under ΔpgcA conditions.

Figure B: Bar chart showing the percentage of cells in different cell length categories for WT and OLI- strains under P_{xyr}ypf-ugtP conditions. The categories are <1.9, 1.9-2.5, 2.5-3.2, 3.2-3.8, 3.8-4.5, and >4.5 µm.
