Dear Mrs, Ms….,

Your participation in completing this questionnaire is extremely important; it allows us to gain a better understanding of the influence of various factors (such as your family living situation or your social welfare cover etc.) on the development of your pregnancy and the health of your new-born child.

You may have already completed this type of questionnaire at the start of your pregnancy. It is however very important for us to find out if there has been any change in your situation and to understand the methods of monitoring your pregnancy.

The information that you provide us will be analysed in a completely anonymous manner; neither your doctor nor the patient care team will be given access to this questionnaire.

If you have any additional questions, please do hesitate to contact the scientific study manager, Dr Azria on 01.40.25.76.69.

Your participation is on a voluntary basis and you may refuse to complete this questionnaire. Once again, thank you for devoting your time to this research.
