Consent Statement

You have been given an invitation card to participate in the RiiSH survey because everyone aged 15 years and above coming to this sexual health clinic is being approached to participate in this survey. Your participation is voluntary. This study is being conducted by the Centre for Sexual Health and HIV Research, University College London, London in collaboration with Public Health England.

What is the survey about?
This survey asks about your sexual behaviour, factors that influence your sexual behaviour and precautions you take, and your use of health services including STI clinics. The survey is CONFIDENTIAL – you will not be asked for your name or address or any identifiable data or means of contacting you in the future. Please answer all questions honestly. Please complete this survey ONLY ONCE. The survey results will help us understand the reasons for sexual inequalities in health and develop interventions to improve healthcare.
What will happen if you decide to take part?
It will take approximately 10-15 minutes to complete the survey. You will not lose your place in the clinic queue because you are doing the survey. Once you complete the survey and submit your answers, the data will be stored on a secure server and will be treated confidentially. The clinic staff will not be able to see your survey responses. If you agree, we will link your survey answers to existing information on STI tests and diagnoses that is routinely collected by Public Health England from sexual health clinics in England. We will link your survey answers to the routinely collected data using the unique passcode you typed at the start of the survey and your clinic number that will be given to us by the clinic.

Once the data are linked the unique passcode and your clinic number will be removed. Only anonymous data will be analysed and reported on. If you do not agree to the linkage, you can still participate in the survey but we will not link your answers to the routinely collected data.

Thank you very much for taking the time to consider taking part in this study.  
Please tick the appropriate box to indicate whether you agree to participate in this survey. If you tick the box 'I do not agree to participate', you will exit the survey.

- I have read and understood the participant information sheet (v2: 08.02/2016) and I agree to participate in the survey
- I do not agree to participate in the survey

Please tick the appropriate box to indicate whether you agree to link your survey answers to existing routinely collected data on STI diagnosis and testing. If you tick the box ‘I agree to the linkage’ the linked data will be completely and irreversibly anonymised before being analysed.

- I agree to the linkage
- I do not agree to the linkage
