Survey for dispensers regarding generic substitution and reference price system

Answer the questions by circling the number of the appropriate response option. If necessary, write the answer in the space reserved. It is important to answer all the questions.

1. Are you working at a pharmacy at the moment?
   1. No → Please return the blank form in the attached return envelope.
   2. Yes → Please continue filling in the form.

2. Your year of birth? ________________

3. Your gender?
   1. Male
   2. Female

4. Number of prescriptions dispensed in 2017 at the pharmacy where you are working?
   1. ≤30,000
   2. 30,001 to 60,000
   3. 60,001 to 100,000
   4. ≥100,001

5. Location of the pharmacy where you are working?
   1. Southern Finland
   2. Southwestern Finland
   3. Western and Inland Finland
   4. Eastern Finland
   5. Northern Finland
   6. Lapland

6. What do you think about the following statements? In each statement, circle the number of the option you consider appropriate.

<table>
<thead>
<tr>
<th>Statement</th>
<th>Completely agree</th>
<th>Agree to some extent</th>
<th>Disagree to some extent</th>
<th>Completely disagree</th>
<th>Don't know</th>
</tr>
</thead>
<tbody>
<tr>
<td>I think that the possibility to substitute a medicine at a pharmacy with an equivalent, but cheaper, medicinal product is a good thing</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>Generic substitution usually goes smoothly when dispensing prescriptions</td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>The price advice obligation regarding the cheapest medicine is well observed at the point of dispensing the prescription</td>
<td>1</td>

   ___________________________________________________________________
   ___________________________________________________________________
10. What are the most common questions asked by customers regarding generic substitution and the reference price system?

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

11. What things make it easier to give advice to customers about generic substitution and the reference price system?

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

12. What things make it more difficult to give advice to customers about generic substitution and the reference price system?

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

13. On what grounds do you choose the interchangeable medicinal product primarily offered to the customer within the reference price group?

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

14. On what grounds does your pharmacy choose which interchangeable prescription medicinal products to stock? You may choose several options.

1   The product is in the reference price band
2   The product is the cheapest in the reference price band
3   The product is the most expensive in the reference price band
4   The product has a long shelf life
5   The product is manufactured by a reliable pharmaceutical company
6   The product is Finnish
7   The product is usually readily available
8   The product is supplied by a reliable pharmaceutical wholesaler
9   The pharmaceutical company compensates for the fall in stock value resulting from changes in the product’s price
10  The pharmaceutical company compensates for expired medicinal products.
11  Other factor. Which?

_________________________________________________________________________________________

12  Don’t know
15. Are there any problems related to stocking the cheapest medicinal product in reference price groups?
   1. No
   2. Yes. What kind?

__________________________________________________________________________________________

16. In your opinion, what are the main advantages of generic substitution and the reference price system?

__________________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________

17. In your opinion, what are the main problems with generic substitution and the reference price system?

__________________________________________________________________________________________

__________________________________________________________________________________________

__________________________________________________________________________________________

18. Are the law and official regulations regarding generic substitution and the reference price system clear?
   1. Yes
   2. Don’t know
   3. No. What things are problematic?

__________________________________________________________________________________________

__________________________________________________________________________________________

Here you can write your comments about this survey and your experiences of generic substitution and the reference price system. If necessary, you can continue e.g. on the back of the cover letter and return it with the questionnaire.
