Supplementary Fig. S4

(a) Dex, Dex + sucrose, and Sucrose washout images.

(b) Comparison of Dex and Dex + NaCl images. Bar graph showing (Dex+NaCl) / Dex ratio for Volume and Intensity with statistical significance indicated by asterisks.

(c) GFP-fusion, H2B-mCherry, Merge, and Dots mask images. Line graph showing relative dots count across different conditions with GR+Dex, GR+Veh, and GFP conditions.
