Supplemental Figure 1. Relationship Between Individual Biomarkers and FEV$_1$.
Supplemental Figure 2. Relationship Between Individual Biomarkers and Emphysema. Analysis performed by ordinal logistic regression. Covariates were FEV₁, age, smoking status, gender and BMI. % Emphysema defined as % of voxels with HU < -950. *p<0.01.
Supplemental Fig. 3. Distribution of Biomarkers: COPDGene. Biomarkers are Log Normally Distributed.
