Antibody titers of the non-parasitized mice were excluded from calculation. Parasitized mice were encircled.

Figure 60. Immunogenicity of N4PbCS at 30YU, 150YU, and 300YU in yeast lysates.

* for p<0.005, ** for p<0.0005, Mann-Whitney test.

Antibody responses at day 42.

Stages of sporozoites (experiment 3). (F) L Parasitemia at day 5 post-challenge. Bars indicate median values per group.*

Asterisks correspond to significant differences.

Parasitemia (%) at day 5.

IgG2b

Antibody titers of the non-parasitized mice were indicated in folds. Non-parasitized mice were excluded from calculation. Parasitized mice are encircled.

Figure 60. Immunogenicity of N4PbCS at 30YU, 150YU, and 300YU in yeast lysates.

* for p<0.005, ** for p<0.0005, Mann-Whitney test.
