Diseases and functions

malignant solid tumor
breast or colorectal cancer
metastatic colorectal cancer
cancer
metastasis
migration of cells
cell movement
proliferation of cells
migration of tumor cell lines
cell proliferation of breast cancer cell lines
cell movement of tumor cell lines
migration of breast cancer cell lines
cell movement of breast cancer cell lines
differentiation of cells
cell death
colonies formation of cells
differentiation of stem cells
activation of cells
growth of embryo
activation of osteoclasts
necrosis
cell viability of breast cancer cell lines
colonies formation of breast cancer cell lines
cell death of breast cancer cell lines
arrest in interphase of breast cancer cell lines
apoptosis
migration of melanoma cell lines
binding of breast cancer cell lines
cell viability
apoptosis of breast cancer cell lines
invasion of breast cancer cell lines
proliferation of stromal cells
mitosis
chemotaxis of cells
proliferation of stem cells
