Supplementary Data Figure 1. Control experiments for acetic acid test

Writhing behavior in response to intraperitoneal injection of PBS, or acetic acid in the presence of either vehicle or the anti-inflammatory Diacerin. Note that PBS injection does not result in writhing behavior, whereas acetic acid produces writhes that can be blocked by Diacerin. Each bar includes data from five mice.
Vehicle i.p.  Veh (10 μl/i.t.)  Diac (50 μg/i.t.)

Acetic Acid (0.9%, i.p.)

Total Number of Writhes
