Supplementary Figure 1. Principal component analysis model with all mothers (n = 100) and all measured lipids. (A) Loadings plot. (B) Scores plot: Low cortisol group marked with blue square; High cortisol group marked with red circle. Label abbreviations for variables: PA, relative abundance of fatty acid in phospholipids; Pg, mg/mL fatty acid in phospholipids; TA, relative abundance of fatty acid peak in triacylglycerols; Tg, mg/mL fatty acid in triacylglycerols.
