In this survey we are going to ask you some questions about cancer and testing for it. You may or may not have any knowledge about these things, and this is ok. Even if you have not heard of cancer or ways of testing for it, this is important for us to know. You can mark a 'not sure' response to any question if you just don't know the answer.

This survey is the last survey for Project HEAL. We will share our findings back to you so that you know what happened with the project.

We thank you for your patience with this important part of the project.

Please read each question carefully.

Feel free to ask the members of the HEAL staff to assist you if you need any help or have any questions.

Let’s begin!
Thank you for taking part in the HEAL project. Your answers on this survey will help to see if the project is making a difference in your community. Please give your honest and best answers.

For each question, please place an x in the box that most closely reflects your attitude or feeling. Other questions will ask you to write in your answer. There are no right or wrong answers - we are interested in your honest opinions.

Have you shared the knowledge from Project HEAL workshops with any of the below? (Mark all that apply)

- Family members
- Friends
- Co-workers
- Congregation members
- None
- Other: ________________________
