Determining participant need and providing the model of care

RN or SW phone call or home visit to participant:
If “YES” to questions 1-6, participant could benefit from the model of care.

1. Was participant a new admission to MI Choice?  YES NO N/A
2. Did the participant just get discharged (hospital/nursing home)?  YES NO N/A
3. Is the participant cognizant and able to communicate?  YES NO N/A
4. Did the participant have a desire or need?  YES NO N/A
5. Is the participant ready to change?  YES NO N/A
6. Is the participant motivated to change?  YES NO N/A

If “YES” to questions 7-10, may need OT or increased RN or SW home visits briefly.

7. Is there a need for the OT to assist with function?  YES NO N/A
8. Does the participant have DME they do not know how to use?  YES NO N/A
9. Does the RN need to review the medication list?  YES NO N/A
10. Does the SW need to evaluate the participant’s depression?  YES NO N/A

SC decision after considering above questions:
- Participant has a desire or need that the model of care is likely to improve
- Participant would benefit from additional home visits

Recommendation for additional home visit(s):
- OT to conduct an assessment to determine how to improve function
- RN to evaluate medications, and/or manage pain, incontinence, or other health needs
- SW to evaluate depression and/or assist with community resources

*Tailor PCSP Add the model of care to Arranged Services
