Fig. S1 Irradiation-induced fibroblast cell death promotes cancer cell metastasis in vitro. Varied-dose X-ray (0, 4, 8, and 12Gy) treated fibroblast cells seeded in the lower chamber and Panc-1 and SW1990 cells in the upper chamber co-cultured in the transwell system for the indicated time (6, 12, and 18h). Imagings were taken by electron microscope. Magnification: ×20. Experiments were repeated three times and the data were expressed as mean±SEM. * p<0.05, ** p<0.01, *** p<0.001.
