Fig. S7. Correlation between CNV of cellular genes and low EBV copy number in NPC plasma.

(A) Figure showing CNV of cellular genes.

(B) Figure showing correlation between CNV and log EBV.

(C) Survival functions for different EBV categories (EBV < 5000 vs. EBV > 5000), with P=0.003.

(D) Survival functions for different EBV categories (EBV < 10000 vs. EBV > 10000), with P<0.001.
