FIGURE S2. (A) Percentage of GFP- and TomatoRed-labelled tumor cells in each collected tumor, showing no transfer of tumor cells between bilateral tumors in groups treated with control diet. (B) Percentage of GFP- and TomatoRed-labelled tumor cells in each collected tumor, showing no transfer of tumor cells between bilateral tumors in groups treated with erlotinib diet. (C) GFP imaging of lung metastasis. (D) TomatoRed imaging of lung metastasis. (E) Combined GFP and TomatoRed imaging with spectral imaging. (F) Combined GFP and TomatoRed imaging, fluorescence only.
