FIGURE S4. (A) Average weight of mice per group during the course of the experiment. Green arrow indicates when Erlotinib treatment was discontinued. (B) H&E staining of tumor section of left-side tumor from 0% MSC group treated with erlotinib diet. (C) H&E staining of tumor section of right-side tumor from 0% MSC group treated with erlotinib diet. (D) H&E staining of tumor section of left-side (ipsilateral) tumor from 10% MSC group treated with erlotinib diet. (E) H&E staining of tumor section of right-side (contralateral) tumor from 10% MSC group treated with erlotinib diet. Scale bar is 200 µm in all images.
