Methylation State of p16<sup>INK4a</sup> Promoter
14BPEC

The diagram shows the methylation mean (%) for different PD stages (PD1, PD18, PD25, PD30) with error bars indicating the variability or standard deviation.

- PD1: Methylation mean is lower compared to后面的 stages.
- PD18, PD25, PD30: Methylation means are higher, with PD25 and PD30 showing similar methylation levels.
