The Kaplan-Meier curve shows the proportion recurrence-free over time. The model prediction includes two risk groups: Low Risk and High Risk.

- **Low Risk**:
  - Number of patients: 125
  - RFS% = 93%

- **High Risk**:
  - Number of patients: 24
  - RFS% = 29%

The statistical significance is indicated by *p* < 0.0001.
