</table>

Introduction
| Background and rationale | 6a | Description of research question and justification for undertaking the trial, including summary of relevant studies (published and unpublished) examining benefits and harms for each intervention  
Page 5, line 2-33 and page 6 line 1-8 |
|--------------------------|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | 6b | Explanation for choice of comparators  
Page 5 line 28-30 |
| Objectives               | 7  | Specific objectives or hypotheses  
Page 6, line 9-13 |
| Trial design             | 8  | Description of trial design including type of trial (eg, parallel group, crossover, factorial, single group), allocation ratio, and framework (eg, superiority, equivalence, noninferiority, exploratory)  
Page 7, line 2-5 |

**Methods: Participants, interventions, and outcomes**

| Study setting            | 9   | Description of study settings (eg, community clinic, academic hospital) and list of countries where data will be collected. Reference to where list of study sites can be obtained  
Page 7, line 5-15 |
|--------------------------|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eligibility criteria     | 10   | Inclusion and exclusion criteria for participants. If applicable, eligibility criteria for study centres and individuals who will perform the interventions (eg, surgeons, psychotherapists)  
Table 1 |
| Interventions            | 11a  | Interventions for each group with sufficient detail to allow replication, including how and when they will be administered  
Page 8, line 18 - page 15, line 13 |
|                          | 11b  | Criteria for discontinuing or modifying allocated interventions for a given trial participant (eg, drug dose change in response to harms, participant request, or improving/worsening disease)  
Not applicable |
|                          | 11c  | Strategies to improve adherence to intervention protocols, and any procedures for monitoring adherence (eg, drug tablet return, laboratory tests)  
Not applicable |
|                          | 11d  | Relevant concomitant care and interventions that are permitted or prohibited during the trial  
Not applicable |
Outcomes

Primary, secondary, and other outcomes, including the specific measurement variable (eg, systolic blood pressure), analysis metric (eg, change from baseline, final value, time to event), method of aggregation (eg, median, proportion), and time point for each outcome. Explanation of the clinical relevance of chosen efficacy and harm outcomes is strongly recommended

Page 17, line 1-24

Participant timeline

Time schedule of enrolment, interventions (including any run-ins and washouts), assessments, and visits for participants. A schematic diagram is highly recommended (see Figure)

Figure 1, text page 28, line 5-10

Sample size

Estimated number of participants needed to achieve study objectives and how it was determined, including clinical and statistical assumptions supporting any sample size calculations

Page 17, line 25-33 and page 18, line 1-2

Recruitment

Strategies for achieving adequate participant enrolment to reach target sample size

Not applicable

Methods: Assignment of interventions (for controlled trials)

Allocation:

Sequence generation

Method of generating the allocation sequence (eg, computer-generated random numbers), and list of any factors for stratification. To reduce predictability of a random sequence, details of any planned restriction (eg, blocking) should be provided in a separate document that is unavailable to those who enrol participants or assign interventions

Page 16, line 1-8

Allocation concealment mechanism

Mechanism of implementing the allocation sequence (eg, central telephone; sequentially numbered, opaque, sealed envelopes), describing any steps to conceal the sequence until interventions are assigned

Not applicable

Implementation

Who will generate the allocation sequence, who will enrol participants, and who will assign participants to interventions

Page 16, line 5-6

Blinding (masking)

Who will be blinded after assignment to interventions (eg, trial participants, care providers, outcome assessors, data analysts), and how

Page 16, line 7-8
### Methods: Data collection, management, and analysis

<table>
<thead>
<tr>
<th>Method</th>
<th>Details</th>
<th>Note</th>
</tr>
</thead>
</table>
| **Data collection methods** | 18a Plans for assessment and collection of outcome, baseline, and other trial data, including any related processes to promote data quality (eg, duplicate measurements, training of assessors) and a description of study instruments (eg, questionnaires, laboratory tests) along with their reliability and validity, if known. Reference to where data collection forms can be found, if not in the protocol.  

*Page 16, line 9-24*                                                                 |               |
|                             | 18b Plans to promote participant retention and complete follow-up, including list of any outcome data to be collected for participants who discontinue or deviate from intervention protocols.  

*Not applicable*                                                                 |               |
| **Data management**         | 19 Plans for data entry, coding, security, and storage, including any related processes to promote data quality (eg, double data entry; range checks for data values). Reference to where details of data management procedures can be found, if not in the protocol.  

*Page 16, line 10-25*                                                                 |               |
| **Statistical methods**     | 20a Statistical methods for analysing primary and secondary outcomes. Reference to where other details of the statistical analysis plan can be found, if not in the protocol.  

*Page 16, line 28-33 and page 17, line 2-25*                                                                 |               |
|                             | 20b Methods for any additional analyses (eg, subgroup and adjusted analyses)  

*Not applicable*                                                                 |               |
|                             | 20c Definition of analysis population relating to protocol non-adherence (eg, as randomised analysis), and any statistical methods to handle missing data (eg, multiple imputation)  

*Not applicable*                                                                 |               |

### Methods: Monitoring

<table>
<thead>
<tr>
<th>Method</th>
<th>Details</th>
<th>Note</th>
</tr>
</thead>
</table>
| **Data monitoring**         | 21a Composition of data monitoring committee (DMC); summary of its role and reporting structure; statement of whether it is independent from the sponsor and competing interests; and reference to where further details about its charter can be found, if not in the protocol.  

Alternatively, an explanation of why a DMC is not needed.  

*Page 15, line 28-31*                                                                 |               |
21b Description of any interim analyses and stopping guidelines, including who will have access to these interim results and make the final decision to terminate the trial

*Not applicable*

### Harms

22 Plans for collecting, assessing, reporting, and managing solicited and spontaneously reported adverse events and other unintended effects of trial interventions or trial conduct

*Page 16, line 23-24*

### Auditing

23 Frequency and procedures for auditing trial conduct, if any, and whether the process will be independent from investigators and the sponsor

*Not applicable*

### Ethics and dissemination

#### Research ethics approval

24 Plans for seeking research ethics committee/institutional review board (REC/IRB) approval

*Page 18, line 5-12*

#### Protocol amendments

25 Plans for communicating important protocol modifications (eg, changes to eligibility criteria, outcomes, analyses) to relevant parties (eg, investigators, REC/IRBs, trial participants, trial registries, journals, regulators)

*Not applicable*

#### Consent or assent

26a Who will obtain informed consent or assent from potential trial participants or authorised surrogates, and how (see Item 32)

*Page 15, line 26-27*

26b Additional consent provisions for collection and use of participant data and biological specimens in ancillary studies, if applicable

*Page 18, line 9-11*

#### Confidentiality

27 How personal information about potential and enrolled participants will be collected, shared, and maintained in order to protect confidentiality before, during, and after the trial

*Page 15, line 25-26*

#### Declaration of interests

28 Financial and other competing interests for principal investigators for the overall trial and each study site

*Page 1, line 20 and page 21, line 19*

#### Access to data

29 Statement of who will have access to the final trial dataset, and disclosure of contractual agreements that limit such access for investigators

*Page 15, line 28*
