Shared decision making for stroke prevention in atrial fibrillation (SDM4Afib)

Thank you for taking the time to complete this survey. Your answers are very important to us. Thinking about the conversation you just had with your patient about anticoagulation medications, please read and answer each question. Your responses are confidential.

1. What decision did you and your patient make today regarding anticoagulation medication?

- [ ] To start or continue on Warfarin
- [ ] To start or continue on Apixaban (Eliquis) or Dabigatran (Pradaxa) or Edoxaban (Savaysa) or Rivaroxaban (Xarelto)
- [ ] To not take an anticoagulation medication
- [ ] To start taking Aspirin or other antiplatelet agent for the purpose of stroke prevention
- [ ] To make the decision at some other time
- [ ] No discussion about anticoagulation medication took place
- [ ] Other, please specify: ___________________________________________________

2. To what extent did you feel satisfied with the discussions you just had with your patient about taking an anticoagulant?

- [ ] NA no discussion
- [ ] Not at all satisfied
- [ ] Somewhat satisfied
- [ ] Completely satisfied

3. Would you recommend to other clinicians the way you and your patient worked together today to make a decision about taking an anticoagulant?

- [ ] NA No discussion
- [ ] No, I would strongly recommend against it
- [ ] Not sure whether to recommend it or not
- [ ] Yes, I would strongly recommend it
SHARED DECISION MAKING FOR STROKE PREVENTION IN ATRIAL FIBRILLATION (Second)
