**Figure 1.**

**A.** Effect of TQ (100 mg/kg) and DA (25 mg/kg) on HGB (g/dL) levels. Significant differences are indicated by asterisks.

**B.** Effect of TQ (100 mg/kg) and DA (25 mg/kg) on HCT (%) levels. Significant differences are indicated by asterisks.

**C.** Effect of TQ (100 mg/kg) and DA (25 mg/kg) on MCV (fL) levels. Significant differences are indicated by asterisks.

**D.** Effect of TQ (100 mg/kg) and DA (25 mg/kg) on MCH (Pg) levels. Significant differences are indicated by asterisks.

**E.** Effect of TQ (100 mg/kg) and DA (25 mg/kg) on RDW (%) levels. Significant differences are indicated by asterisks.
