Additional figure 4. DAS parameters and DAS responder rates over time in the total population

Mean (a) CRP; (b) DAS28-3(CRP); (c) ESR; and (d) DAS28-4(ESR); and rate of (e) DAS28-3(CRP) <2.6; (f) DAS28-3(CRP) ≤3.2; (g) DAS28-4(ESR) <2.6; and (h) DAS28-4(ESR) ≤3.2
Baseline values were those of the Phase 2 or Phase 3 index study.

CRP, C-reactive protein; DAS, Disease Activity Score; DAS28<2.6: remission; DAS28≤3.2: low level of disease activity; ESR, erythrocyte sedimentation rate; SE, standard error
